[www.propeller.co.uk](http://www.propeller.co.uk)  
July 2015 - July 2017

**Freelance Web Designer &  
Developer**  
June 2013 - July 2015

## Proficient

## Knowledgeable

**Coventry University**  
Sep 2010 - June 2014

I am a Front-End Developer with a thirst for creativity. I build smooth apps and websites with a story and, while my passion lies in solving problems, my experience as an artist taught me that composition, colour theory and dynamism do not only apply to art, or at least not in its traditional sense. Front-End is a craft.

## Experience

- Tech Lead for clients such as Tom Holkenborg, Leading Courses <sup>(BETA)</sup>, Rouze and PON Automotive.
- Rebuilt Jungle Minds' new portfolio website.
- Responsible for security audits (XSS, CSRF, private keys leak, npm package vulnerabilities).
- Responsible for performance audits (Lighthouse reports, optimising bundle size and assets, FPS, repainting, memleaks).
- Coaching team members.
- Defining code review standards, merging strategies and conventions.
- Lead Front-End Developer in charge of building user dashboard for employment mediator Brunel International. Tech stack comprised of React and GraphQL and full integration with Sitecore via JSS services.
- Additional responsibilities included mentoring colleagues, performing weekly code reviews and holding cross-team workshops.
- Built the new applicant flow for Brunel International. I was tasked with setting up the project, implementing custom form validation throughout, tracking user behaviour and last, but not least, making things pretty.
- Reviewed applicants and carried out job interviews.
- Contributed regularly to Mirabeau's open-source boilerplate repo.
- Flexible Front-End role where I occasionally got to wear the almighty full-stack hat. I built websites in FuelPHP and WordPress, while also managing a few multi-site templates for hospitality clients.
- Workflow included automation via Gulp, BEM methodology using SASS and version control through Git.
- Responsible for project planning with clients, negotiating contracts, developing wireframes, mock-ups and high-end designs, as well as coding and maintaining websites.

## Tools & Skills

HTML5 | CSS3 & SASS | JavaScript & TypeScript | React & Redux | Jest & Enzyme | REST & GraphQL | Gatsby & Next | Node | Firebase | JWT | npm & Yarn | Lerna | Webpack | Git | CI/CD (Netlify, Gitlab) | Agile & Waterfall | Photoshop | Sketch | Figma

PWA | React Native | Payments (Stripe, Molie) | JS Canvas | GSAP | WebSockets | Web Audio and Speech APIs

## Education

Faculty of Engineering and Computing  
BSc in Multimedia Computing
