Razvan Negrea

Senior Fullstack Engineer

PROFILE

I am a Fullstack Engineer with a thirst for creativity. I build smooth apps and websites with a story, and while my passion lies in solving problems, my experience as an artist taught me that composition, colour theory, and dynamism do not only apply to art. Coding is a craft in itself.

EXPERIENCE

Katanox
Senior Software Engineer
FEB 2025 - PRESENT

- Reduced UI cold-load times from 12.7s -> 2.1s, bundle sizes from 15MB -> 1.7MB and CI/CD times by up to 76%.
- Migrated the authentication & authorisation flow from Laravel Sanctum/Fortify to Kotlin and Keycloak, moving towards a unified SSO solution across all platforms.
- Rebuilt the Booking Engine in Kotlin, including availability search, booking creation, reservation editing and cancellation.
- Improved Frontend engineering standards across the Nx monorepo, enforcing type checking, linting, unit/E2E testing and automated security audits through CI and pre-commit workflows.
- Set up shared infra tooling such as MSW API mocking, automated Keycloak theme releases, reusable CI workflows.
- Contributing across the stack to architectural decisions, code quality, security, observability and development practices.

Freelance

Mirabeau

a Cognizant Digital Business

Sr. Frontend Developer

JAN 2019 - JUN 2019

- Lead Frontend Developer in charge of building user dashboard for employment mediator Brunel International. Tech stack comprised of React and GraphQL and full integration with Sitecore via JSS services.
- Additional responsibilities included mentoring colleagues, performing weekly code reviews and holding cross-team workshops.

Frontend Developer

AUG 2017 - DEC 2018

- Built the new applicant flow for Brunel International. I was tasked with setting up the project, implementing custom multi-step form validation, tracking user behaviour and last, but not least, making things pretty.
- Reviewed applicants and carried out job interviews.
- Contributed regularly to Mirabeau's open-source boilerplate repo.

Propeller Communications

Frontend Developer

JUL 2015 - JUL 2017

- Flexible Frontend role where I occasionally got to wear the almighty Fullstack hat. I built websites in FuelPHP and WordPress, while also managing a few multi-site templates for hospitality clients.
- Workflow included automation via Gulp, BEM methodology using SASS and version control through Git.

Freelance

Web Designer & Developer

JUN 2013 - JUL 2015

- Responsible for project planning with clients, negotiating contracts, developing wireframes, mock-ups and high-end designs, as well as coding and maintaining websites.
